Education

London School of Economics and Political Science (LSE) 2026 - 2027
MSc Management of Information Systems and Digital Innovation

- Modules include Management and Socioeconomics of Digital Innovation, Innovating Organisational IT, and Research Design for Studies in Digital Innovation

Tallinn University of Technology 2023 - 2026
BSc Business Information Technology

- GPA 4.4/5.0, attaining the highest possible grade across all core Information Systems modules (5.0/5.0)
- Thesis: compared retrieval-augmented generation (RAG) approaches for a B2B SaaS platform using a custom evaluation harness; the findings informed the platform's AI rebuild
- Courses: Development of Information Systems, Economics, Finance, Discrete Mathematics, Statistics & Probability
- Selected for a competitive international semester at the Technical University of Munich; successfully completed Master's-level modules in Data Structure Engineering and Network Security

Experience

RingIT OÜ (International Tech Consultancy), Tallinn, Estonia 2024 - Present
Full-Stack Software Engineer (Project: GAIA Global)

- Built GAIA's AI data import end to end: a planning agent that asks users multiple-choice questions, background mapping and a review step before anything is saved; one of the platform's most used AI features
- Built the Intelligence Center, an AI analyst over each customer's own data (Vertex AI, Vercel AI SDK, Langfuse); cut time to first answer from 27.3 s to 12.9 s and cost per answer by 12%, with no write access for the model
- Largest contributor to the codebase (about a third of 7,300+ commits since Dec 2024): unified the legacy company models into one identity, moved email processing to Google Cloud Tasks, built the shared React UI library
- Coordinated delivery daily with the Brazilian office and designed the team's Jira workflow

Playerbank OÜ, Tallinn, Estonia Feb – Aug 2024
Frontend Developer (Internship)

- Executed front-end development within an Agile framework, using Jira and Bitbucket to maintain 100% on-time delivery across bi-weekly sprint cycles
- Designed and engineered responsive user interfaces by translating Figma designs into modular code
- Implemented reusable component libraries, reducing front-end development time for new features

Skills

Technical Skills

- Languages & frameworks: TypeScript, JavaScript, React, Node.js, NestJS, PostgreSQL (Prisma), C#, Rust
- Cloud & tools: Google Cloud (Cloud Tasks, Pub/Sub, Cloud Storage), Git, Docker, Sentry, Jira, Bitbucket, Figma, Lightroom, Photoshop, Final Cut Pro
- AI: LLM agents, Vertex AI (Gemini), Vercel AI SDK, Langfuse tracing and evaluation, RAG, Claude Code

Languages

- Estonian (Native), English (C2), Italian (Conversational), French (Conversational), Russian (Conversational)

Leadership & Interests

START Munich Entrepreneurship Hackathon

- Selected to compete at Europe's leading entrepreneurship hub; collaborated in a team to develop and pitch a high-tech business solution under a 48-hour deadline

Tallinn Transit App: open-source app for Tallinn public transport riders, in progress with a senior engineer
Aviation & Photography: Aviation enthusiast specialising in technical photography of commercial aircraft
